

BaseShare

```
classDiagram
    class BaseShare
    class Queue["Queue< dataType >"]
    class Share["Share< DataType >"]
    BaseShare <|-- Queue
    BaseShare <|-- Share
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'BaseShare'. Below it are two boxes: 'Queue< dataType >' on the left and 'Share< DataType >' on the right. A horizontal line connects the two bottom boxes, and a vertical arrow points from the center of this line up to the 'BaseShare' box, indicating that both 'Queue' and 'Share' inherit from 'BaseShare'.

Queue< dataType >

Share< DataType >
